

# GROUP NO 3

## SUBGROUP 1- LOG FILE

### Features Implemented

- 1) Login System ( Both Students & professors )
- 2) Signup ( Both Students & professors )
- 3) Edit Profile ( Both Students & professors )
- 4) User Table Database

### Day 1

Designing of Forms , Database , Splitting up of Jobs between different people in the subgroup & Basic GUI Design of the above forms/panels. The name of forms were thought and basic overview of what content needs to be put there was ideated. The meeting was mostly based on ideation. Two subgroups were also formed on this day. One consisting of Avneet & Shubham , second consisting of Aranya & Aviral.

### Day 2

Completion of Login System , Storing Passwords using a hash function and connecting database to the forms. Starting of work on the Signup Part of the Project. The Password Hash and Password Salt of the password entered by user was also decided to be stored in the database table named **Users**. Testing of Login System was started on the same day to ensure that signup feature could be added .

### Day 3

Completion of Signup feature for both professors and students . Completion of Update/Edit Profile for both students and professors. Discussion on the GUI to be used in the forms made under the subgroup. The signup feature for both professors and students were coded & tested by Aranya & Aviral on the same day.

### Common Meeting after Day 3

All the forms were finally merged to the master branch in Github so that the forms could be processed for updating GUI and finally deploying in the main project.

### GROUP MEMBERS

- 1) Avneet Singh (170101015)
- 2) Aviral Gupta (170101014)
- 3) Shubham Kumar (170101064)
- 4) Aranya Aryaman (170101011)
